

Application No: GB0522155.1

Examiner: Dr Lyndon Ellis

Claims searched: 1-49

Date of search: 7 March 2006

## Patents Act 1977: Search Report under Section 17

### Documents considered to be relevant:

Category	Relevant to claims	Identity of document and passage or figure of particular relevance
X,E	1 at least	GB 2416795 A (Brisco) Whole document, noting the claims
X,E	1 at least	GB 2396869 A (Whanger) Whole document, noting page 18, lines 11-21 and page 14, final paragraph
X,P	1 at least	GB 2391028 A (Smith) Whole document, noting claim 4

### Categories:

X	Document indicating lack of novelty or inventive step	A	Document indicating technological background and/or state of the art.
Y	Document indicating lack of inventive step if combined with one or more other documents of same category.	P	Document published on or after the declared priority date but before the filing date of this invention.
&	Member of the same patent family	E	Patent document published on or after, but with priority date earlier than, the filing date of this application.

### Field of Search:

Search of GB, EP, WO & US patent documents classified in the following areas of the UKC<sup>X</sup> :

E1F

Worldwide search of patent documents classified in the following areas of the IPC

E21B

The following online and other databases have been used in the preparation of this search report

## **Patents Act 1977**

### **Examination Report under Section 18(3)**

#### **Plurality of invention**

1. Your claims define a number of separate inventions not forming a single inventive concept, however due to the lack of conciseness no attempt is being made to determine how many inventions there actually are. This report therefore relates only to claims 1-49.
2. You will need to amend your claims, so that they relate to only one invention or inventive concept. You will also need to make consequential amendments to the description. You may wish to consider filing divisional applications. Any such applications should normally be filed no later than 3 months before the expiry of the period for putting the present application in order.

#### **Scope of search**

3. In accordance with Section 17(6), only the first of these inventions has been searched. The other inventions can be searched if you wish. In this case you will have to file a further Form 9A/77 for each of the additional inventions to be searched.

#### **What this report covers**

4. I have not been able to consider the novelty or obviousness of the unsearched inventions.

#### **Novelty**

5. The invention as defined in claims 1 at least is not new because it has already been disclosed in each of the following documents:

GB 2416795 A (Brisco) Whole document, noting the claims  
GB 2396869 A (Whanger) Whole document, noting page 18, lines 11-21 and page 14, final paragraph  
GB 2391028 A (Smith) Whole document, noting claim 4

6. No amendment of your claims will be needed in respect of the above documents marked if you can show that the priority date of your invention is not later than the priority date of the relevant disclosure in the documents.

Date of report: 8 March 2006  
Page 2 / 2

**[Examination Report contd.]**

7. Document '795 would appear to represent a complete anticipation of the claims. The other two documents show apparatus for plastically expanding tubulars where cutting devices are present.

**Conciseness and clarity**

8. The claims fail to meet the requirements of Section 14.5.b of the Act with regard to the number of independent claims.

9. The statements of invention under "Summary of the invention" and from paragraph 00337 onwards need to be brought into agreement with the claims

10. There are a number of application numbers missing from pages 10, 55 and 94.
